Disclaimer:

A schedule planning guide is a semester-by-semester listing of the courses required to complete a particular course of study. Its purpose is to guide the student in selecting courses in which to enroll each term.

While the planning guide shown is generally considered to be the most efficient sequence of courses for this program, it does not necessarily represent the *only* sequence for completing the program. As long as prerequisite requirements are met and College and departmental policies are followed, students are free to follow any sequence of courses that meet the program requirements.

Finally, the planning guide shown does not constitute a contract between the student and the College. Students should consult with their academic advisor regularly to ensure all program requirements are being fulfilled.
